Petrel Fish pumps

Petrel Fish pumps are powered by a heavy duty radial piston motor. The motors are metallised and incorporate special seals to meet the demands needed in pumping from purse seine nets or cod end of a trawl.

The pump housing and impeller are produced in sea water resistant aluminium. For pumping from purse seine nets a net cage is supplied, and trawl svivel for pumping from the cod end of a trawl.

The units are low weight and high capacity. Range from 12"-20"

Re-conditioned pumps

In addition to the Petrel range of Fish pumps Meydam also supply re-conditioned pumps

Meydam supplies re-conditioned pumps from a range of manufacturers. During the last 5 years we have delivered more than 100 re-conditioned pumps.

Petrel FP 3500 - M/S "Nordkyndfisk"
