Meydam Net crane stackers

Meydam supplies Net crane stackers for vessels of all sizes. New units are from Petrel and Meydam TMP. In addition we supply re-conditioned units and have carried out major installations onboard both Norwegian and foreign vessels.

Petrel NCS 5 - M/S "Isafold"

Petrel KNC 10 - M/S "Olagutt"

Petrel Net crane stackers

The Petrel Knuckle Boom Net crane stacker is a hydraulically powered, variable speed, 4 dimensional articulated unit. The Netcrane has a 360° slewing facility which allows it to cover the whole netbin/s area and other areas within its working radius. Tandem Arms ensure that the net hauling 'Head' always remains horizontal regardless of where the Netcrane arms are positioned.

The arms raise and lower to extend and retract the head to allow positioning of the head over the selected net stacking position. The head has a slewing function to maintain the alignment to the net and to correct control or correct twisting of the net.

Petrel has 5 models of Knuckle Boom Net crane stackers. These range from 1.5 ton pull to 8,9 ton pull. Four models of winches are offered on the Knuckle Boom Net crane stackers. These range from 1.5 ton pull to 5.0 ton pull on second layer.

Meydam TMP Net crane Stackers

We supply both KL and L series of Net crane stackers - T1300 or R-500 versions. Meydam TMP Net crane stackers are supplied fully rust protected. The crane is metalised, with stainless steel piston rods, bolts, pins etc.

Net stacker head T 1300 is produced with aluminium shields and 1300 kg pull. For vessels between 50 - 100 foot.

R-300 roller is produced with shields of stainless steel and 1.500 kg pull. For vessels between 70 - 110 foot.

Meydam TMP KL 9 with T 1300 stacker head.
